Subject: Lake Sampling

1. Please scan in the field books from cover through the last entered page. Including earlier Lake sampling efforts this year. I don't think the earlier events are scanned and available for review.
2. Did the Lake profiles indicate whether the Lakes had turned over yet? What were the deep DO levels?
3. What is your availability schedule looking like through the end of the year? Include any anticipated sampling efforts in Wichita.
4. The Tyson Research Facility is available for sampling. The fields are about 1.5 miles southeast of the hotel we stayed at in Springdale. Reportedly no chickens. Would you like to lead the sampling team, if we are given approval to conduct the sampling?

Darren L. Brown, L.G.
